Subj: Report of Loran Station Operation and Electronics Engineering, March 1971

Ref: (a) LORSTA ADAK msg 201850 MAR 71

1. Subject report is returned for correction or explanation. You indicate 61.4 minutes of unusable time during the period 201806-1907Z. However, Adak reported you 20 usec. out of tolerance during the period 201616-1840Z, a total of 144 minutes. One of you is in error and we suspect it is you since your monitor timer was inoperative during the period and the operate timer was giving false information due to component failures.
