SUBJECT: Loran-A Modernization Program

1. Proposed Loran-A projects, listed below, will require the storage, up to three years, of a large amount of ground station equipment at the Brooklyn Supply Center.

2. It is requested that the status of the following projects be submitted to this division for planning purposes. Modernization programs for these stations have been halted pending firm plans.
   a. Relocation of Folly Island
   b. Relocation of Guam
   c. Relocation of Pt. Arguello
   d. Disestablishment of French Frigate Shoals
   e. Transfer of Nomeake
   f. Western Gulf extension
   g. Keel program

3. The present modernization program has caused the stockpiling of numerous items of obsolescent Loran-A equipment for possible reuse. This equipment is stored at Coast Guard Supply Center, Brooklyn, and Alameda. It is requested that the quantities of Loran-A equipment required for the standby reserve program and for resale to the Canadian Government be submitted to this division.
