OOPS!!! It was Atafu Single pulsed slave in the Phoenix LORAN chain--Gardner DP master, Baker SP slave and Canton HQ and Monitor. Atafu was CG Unit #93. Helped build it was CG CD Unit 211 in 1943 and stayed on to help man it as a LORAN RT. Me thinks that a lot of the LORAN stations in the Pacific in WWII were lovingly referred to as the 'atolls of the Pacific'--Hi Hi. [Wondering who put the Atafu, Baker and Canton site up here?]
