FIRST ENDORSEMENT

From: LTJG C. R. MURPHY, [REDACTED], USCGR
To: Commander, Seventeenth Coast Guard District (o)

1. The deficiency reported by reference (d), and the corrective action initiated has been noted.

2. Records of accountability for the district-purchased material to be utilized in district work orders which are scheduled to be implemented on Attu in the 4th quarter of FY-74 appear to be either confused or non-existent at Attu. Proper correlation between above mentioned materials stored at Attu and the numerous contracting firms concerned appears to be confused from the standpoint of LORSTA Attu command cognizance.

Many items of the afore mentioned material are either not labelled at all, or show no district work order numbers.

3. There are no facts in dispute.
